EXAMPLES OF PORT LOCATIONS ON TANK:

GUIDELINES FOR LOCATING PORTS:

The tanks are blank at the factory. We need a diagram from you showing which of the three dimensions will be length, width and height.

- Ports located on a hidden side should be indicated with dotted lines.
- Ports can be located on any of the six sides.
- Vent: 1/2" fitting located on the top panel, or at the top of either an end or side panel.
- Inlet: 1 1/2" fitting located on the top panel, or at the top of either an end or side panel.
- Outlet: 1 1/2" fitting located on the bottom panel, or at the bottom of an end or side panel.
- Optional: 1 1/2" dip-tube for discharge from top of tank. 3" clean-out port and plug located on top panel. (extra charge)
